INVESTMENT BOOTCAMP

FROM IDEA TO SIGNAL. OBJECTIVE, UNIVERSE AND DATA.

Golden-Flow, told as it was researched: the idea, the papers, the universe, the data and the signals, before any book. Steps 1, 2 and 3.

SESSION 02 · NOVEMBER 2026

KN

EIGHT STEPS. THIS SESSION, THE FIRST THREE.

1 Bibliotheca
read · objective · blueprint

2 Universe
universe

3 Data
curator · refinery · analyzer

4 Portfolio
portfolio

5 Backtest
backtest

6 Attribution
attribution · alpha-decomposition

7 Paper trading
the graduation gate

8 Production
outside the Lab

You

Which step am I on?

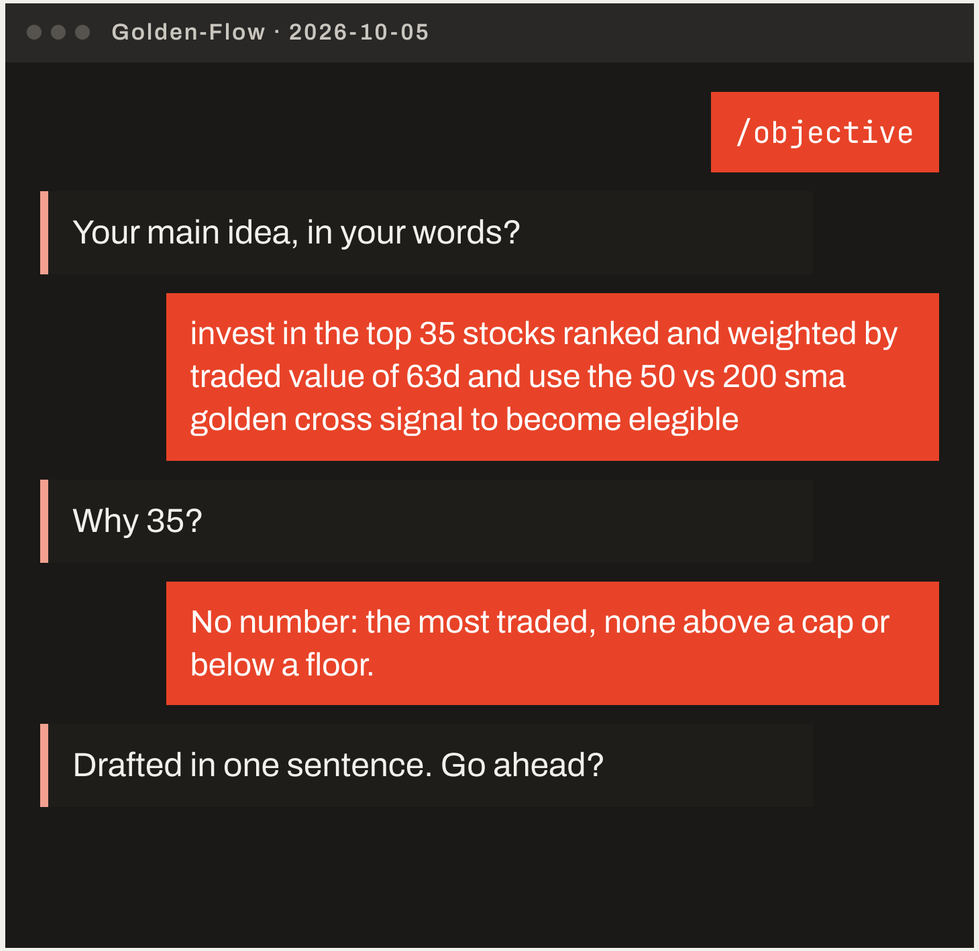

Your researcher

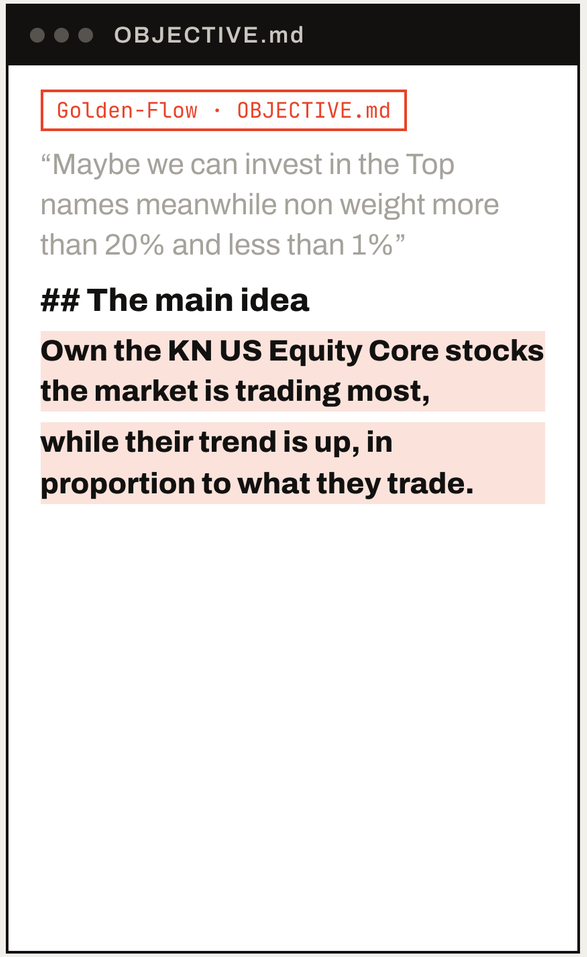

Step 1: your objective, from your library. Then 2, your universe, and 3, your data and signals.

From S01's homework · your idea in one line and the benchmark it must beat

ONE IDEA, SAID IN ONE SENTENCE.

1. Your words first, as they are.
2. Your researcher asks: refine it.
3. The main idea, in one sentence.

THREE CLAIMS, EACH WITH ITS QUESTION.

01

THE SIGNAL: THE GOLDEN CROSS

Does the same rule earn less without the cross?

`r_trend_50_200`

02

THE SIZING: TRADED VALUE

Does weighting by traded value beat equal weight?

`r_traded_value_sma_63d`

03

THE CONSTRUCTION

Does the filter avoid value traps? Do the bounds hold?

`the 20% and 1% bounds`

BEFORE ANY DATA none is tested: each only has its question.

TREND AND MOMENTUM: WHAT SUPPORTS IT.

1993–2017

1993

JEGADEESH & TITMAN

THE CONTRAST

Relative momentum, across stocks.

Returns to Buying Winners and Selling Losers

2007

FABER

THE FILTER

A moving average as a risk filter.

A Quantitative Approach to Tactical Asset Allocation

2012

MOSKOWITZ, OOI & PEDERSEN

THE FAMILY

Time-series momentum: absolute.

Time Series Momentum

2013

ASNESS, MOSKOWITZ & PEDERSEN

THE CONSTRUCTION

Value and momentum move against each other.

Value and Momentum Everywhere

2017

HURST, OOI & PEDERSEN

A CENTURY

Trend, over a century of data.

A Century of Evidence on Trend-Following Investing

WHAT IT MEANS

The golden cross belongs to the trend family, absolute.

THEREFORE

Cite the right family.

WHAT CONTRADICTS IT: LIQUIDITY AND DATA SNOOPING.

1998–2014

1998

DATAR, NAIK & RADCLIFFE

AGAINST THE SIZING

The least traded stocks earn more.

Liquidity and Stock Returns: An Alternative Test

1999

SULLIVAN, TIMMERMANN & WHITE

AGAINST THE SIGNAL

Test many rules, and the best looks too good.

Data-Snooping, Technical Trading Rule Performance, and the Bootstrap

2002

AMIHUD

AGAINST THE SIZING

The less liquid stock pays a premium.

Illiquidity and Stock Returns

2013

IBBOTSON, CHEN, KIM & HU

AGAINST THE SIZING

Liquidity as a style: the least liquid win.

Liquidity as an Investment Style

2014

KAMINSKI & LO

AGAINST THE SIGNAL

Exiting early helps with a trend; without one, it hurts.

When Do Stop-Loss Rules Stop Losses?

WHAT IT MEANS

The sizing has every source against it, and it stayed on purpose.

THEREFORE

The Analyzer measured it first.

DEAD NAMES CARRY PART OF THE RESULT.

1986–1999

1986

BANZ & BREEN

THE DATABASE CHOOSES

Two databases, significantly different returns.

Sample-Dependent Results Using Accounting and Market Data

1992

BROWN ET AL.

SURVIVORS

Survivors alone look predictable.

Survivorship Bias in Performance Studies

1997

SHUMWAY

THE LAST DAY

Delisting returns missing, and large.

The Delisting Bias in CRSP Data

1999

SHUMWAY & WARTHER

THE CORRECTION

With −55% for missing delistings: no size effect on Nasdaq.

The Delisting Bias in CRSP's Nasdaq Data and Its Implications for the Size Effect

WHAT IT MEANS

A universe of today's names has deleted every failure.

THEREFORE

Keep the dead in the seed.

THE MEMBERS AS THEY WERE, NOT AS THEY ARE.

1. **Alive: no last date.**
2. **Dead: they stay.**
3. **Renamed: one identity.**

Universe/Investable_Universe.csv · made-up rows

```
main_identifier,name,identity,valid_from,valid_to
EXA,Example Air,ID-001,2008-01-02,                trades
EXB,Example Bank,ID-002,2005-01-03,2016-05-31     dead: it stays
EXC,Example Chips,ID-003,2005-01-03,2019-03-29    renamed ...
EXD,Example Chips Group,ID-003,2019-04-01,        ... one identity
EXE,Example Energy,ID-004,2006-01-03,2014-08-29   acquired: it stays
```

Required: `main_identifier`. The rest earn their place.

Golden-Flow's seed: 2,203 listings since 1998-12-31, tickers and dates; 1,145 have left the market, and stay.

Golden-Flow · RESULTS.md, row 44 · KN US Equity Core of 2026-11-08.

YOUR UNIVERSE, ON THE LAB.

01 Start from the catalogue: here, every stock FMP covers.

02 Add rules, or start from a benchmark.

03 Check sectors, kinds and sizes; save it.

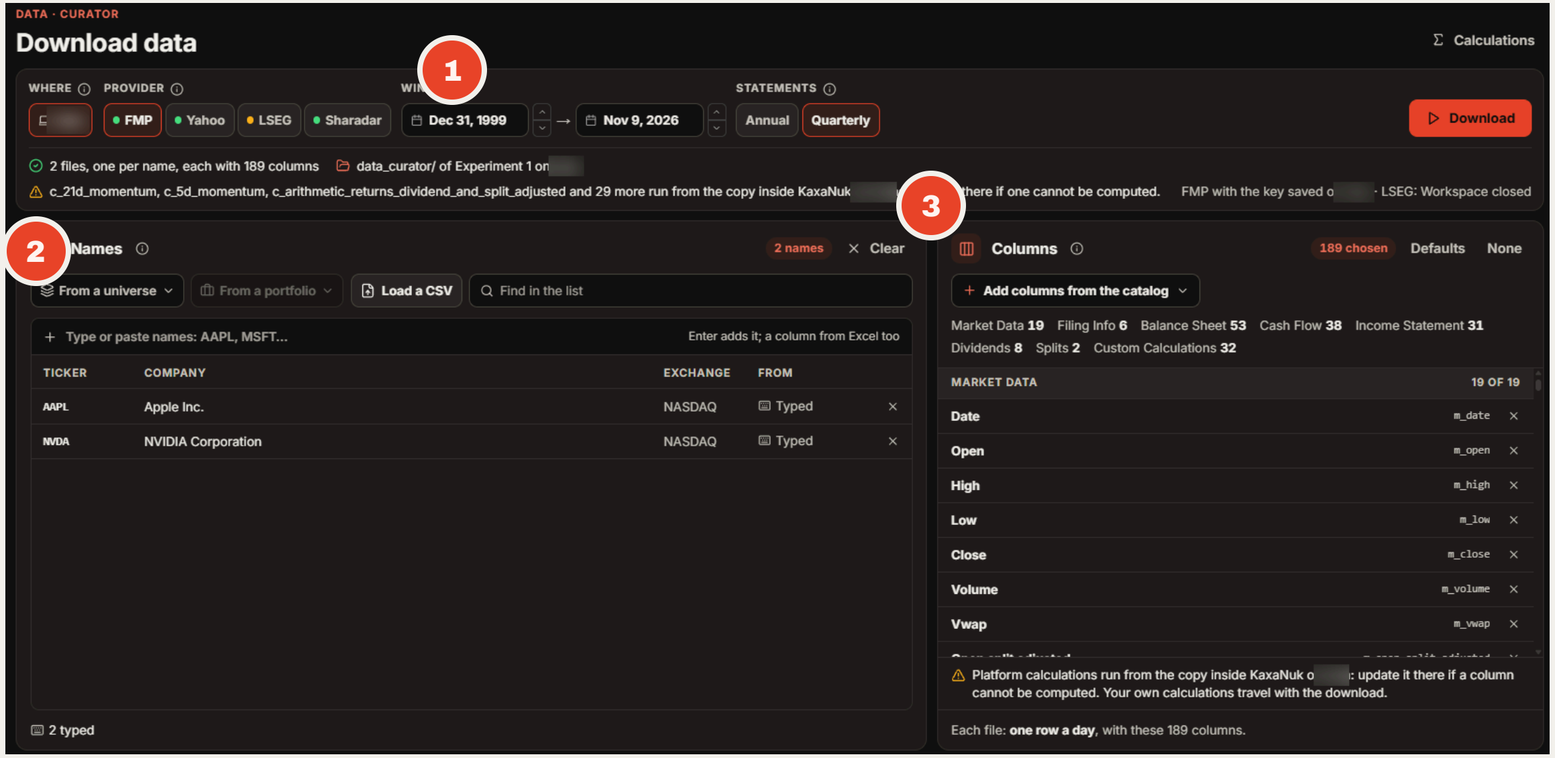

ONE DOWNLOAD, YOUR WHOLE UNIVERSE.

01 The provider and the window: one code for all four.

02 The names: from your universe, a CSV or typed.

03 The columns: from the catalogue, and your c_*.

WHAT IS DOWNLOADED, AND WHAT IS REBUILT.

	IN GOLDEN-FLOW
The provider	Sharadar: it keeps the stocks that stopped trading.
The window	From 1998-01-02: two years early, so the 200-day average is ready.
What the provider gives, `m_*`	Open, high, low, close and volume, each day.
What Golden-Flow computes, `c_*`	The price with dividends, the money traded and each day's return.
Why rebuild	**Sharadar rounds to 3 decimals: on old prices, that moves the price up to 0.8%.**
What it fixed	82 splits with volume adjusted twice, in 77 listings.

ONLY WHAT IS READ the columns are the ones the pipeline uses, and no more.

OUT OF THE REFINERY COME EACH DAY'S SIGNALS.

COLUMN	IN PLAIN WORDS
`r_trend_50_200`	**Is it rising? The 50-day average against the 200-day one.**
`r_traded_value_sma_63d`	**How much money trades in it? A 3-month average.**
`r_liquidity_rank`	Its place that day, from least to most traded.
`r_universe_size`	How many stocks there are that day, to compare them.

BY DATE a rank is taken within its date; every window looks only backward.

SEE YOUR SIGNAL, STOCK BY STOCK.

01 Your signal, on its own axis.

02 Up, the cross on; down, off.

03 The whole history, since 2000.

WITH THE ANALYZER YOU SEE YOUR SIGNAL STOCK BY STOCK.

GOLDEN-FLOW, 2000 TO 2026	STOCKS
Those the Data Analyzer read, from the KN US Equity Core	1,841
Those that earned more with the cross than bought and held	728
Those that earned as much or more bought and held	1,113

WHAT IT IS FOR understand your signal, find the odd stocks and see it all before any book.

Golden-Flow's Data Analyzer, section 5.4, measured 2026-11-10 · RESULTS.md, row 48 · teaching measurement: no costs, cash earns nothing.

YOUR TURN, LIVE.

From your idea to your signal: each step on the Lab with clicks, and in code with your researcher.

1 YOUR IDEA

Obsidian · `/objective`, `read`

2 YOUR UNIVERSE

Creator · `universe-point-in-time`

3 YOUR DATA

Curator · `data-curator-custom-calculations`

4 YOUR SIGNAL

Refinery and Analyzer · `data-analyzer-runs`

AT THE END `next`: your researcher checks the work and says what follows.

THE SESSION'S IDEAS, IN FOUR ANSWERS.

01

WHAT DOES YOUR IDEA CLAIM, AND WHAT WOULD SETTLE IT?

Its claims, each with its question: does the rule earn less without the golden cross?

02

WHICH PAPER SUPPORTS IT, AND WHICH CONTRADICTS IT?

Moskowitz, Ooi & Pedersen (2012) for it; Sullivan, Timmermann & White (1999) and the liquidity papers against.

03

WHY DO YOU KEEP THE NAMES THAT LEFT THE MARKET?

Without them you only see survivors, and the backtest looks better than it was.

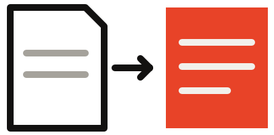

04

WHAT IS THE DATA ANALYZER FOR?

Understanding your signal before any book: stock by stock, finding the odd ones and seeing it all.

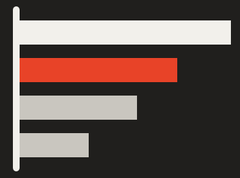

Next, S03: your hypothesis and your historical portfolios.

BEFORE S03: READ, AND THINK OF YOUR HYPOTHESIS.

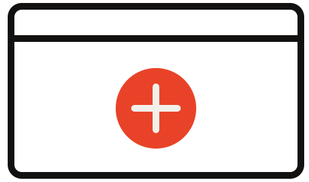

01 READ ON CONSTRUCTION

- DeMiguel, Garlappi & Uppal (2009): 1/N against optimised.
- Maillard, Roncalli & Teïletche (2010): risk parity.
- López de Prado (2016): HRP.

02 LEARN THE METHODS

- Equal weight, inverse volatility, risk parity, HRP.
- `read` each paper; `teach` what you don't follow.
- Which fits your signal?

03 THINK OF YOUR HYPOTHESIS

- What would your signal do in a book?
- Against which control do you compare it?
- Write it in one line, for your experiment 1.

WRITTEN FIRST. ANALYSED NEXT.

Your idea, your sources, your universe, your data and your signal analysed, before any book.

LEARN

The Bootcamp goes on, then the pillars.
